Meeting logbook Entry Sheet

BSc. Project Logbook

Student Name: Pramesh Dulal   **LMU ID:** 23049307

Meeting No: 02   **Start Time:** 11 AM

Date: 2025/11/09   **End Time:** 1 PM

Items Discussed:

1. Review of initial Gantt Chart progress.
2. Discussion on the preparation of the SRS Document.
3. Improvement of the ER Diagram.

Achievements:

Initial Gantt Chart has been successfully prepared, outlining all project phases from November to mid-April. Draft clearly visualizes the timeline for requirement gathering design, implementation, testing, and documentation. First structured version of the SRS document has also been completed, covering the system overview along with functional and non-functional requirements. In addition, ERD has been developed based on the previously discussed entities and relationships, ensuring alignment with the overall project flow and incorporating all required components such as Students, Teachers, Subjects, Assignments, Exams, and Resources.

Problems:

During the preparation of the SRS document, difficulty was encountered in structuring certain system functionalities because several features required further clarification from the supervisor, particularly automatic MCQ generation and the live group discussion modules. Alignment issues also occurred in the ERD, as some relationships such as submission-to-exam and resource categorization needed reevaluation due to missing details.

Tasks for the Next Meeting:

1.   Revise the SRS document based on supervisor feedback.
2.   Update and finalize the ERD with corrected relationships.
3.   Create GitHub repo with naming convention and adding external and internal supervisor as collaborator

Internal Supervisor Name: Jeevan Poudel

External Supervisor Name: Dipesh Khanal
